🏅 CERTIFICATES

HTML/CSS, JS, Reactjs, Bootstrap
basic to moderate

Java
Basic

Circuit theory and basic electronics
Field certificate

📁 PROJECTS

TRAFFIC RULE REWARD, USING IOT
Final year Project
This project uses IoT technology to monitor compliance with traffic rules. Drivers who follow rules, such as speed limits and signal obedience, are rewarded with points redeemable for benefits like fuel or insurance discounts. The system promotes road safety and responsible driving behavior.

RANDOM PASSWORD GENERATOR
Mini project
This project generates secure, random passwords to enhance online security. By combining uppercase and lowercase letters, numbers, and special characters, the generator creates strong passwords that are difficult to guess or crack. Users can specify the desired password length and complexity, ensuring customized security solutions for various applications.
